# Introduction

**AUTHORITY AND SCOPE**—The economic censuses are required by law under Title 13, U.S. Code, sections 131, 191, and 224. The 1967 Census of Business portion of the economic censuses consists of firms engaged in retail trade, wholesale trade, and selected services (hotels and motels; personal, business, and repair services; and amusement and recreation services including the motion picture industry) which operated in the United States. In addition, the Census of Business covered public warehouses, dental laboratories, law firms, architectural and engineering firms, travel agencies, and truck and bus carriers not subject to economic regulation by the Interstate Commerce Commission. Data for the contract construction industry also were collected in this census but published in a separate series of reports. The 1967 Census of Business also covered Guam and the Virgin Islands. A separate 1967 Census of Business, Manufacturers, and Construction for Puerto Rico was conducted jointly with the Commonwealth Government.

**KINDS OF BUSINESS COVERED**—The 1967 Census of Selected Services covers the following industries as defined in the Standard Industrial Classification (SIC) Manual:<sup>1</sup>

SIC code	Title
701, 703	Hotels, motels, camps, and trailer parks
72	Personal services
73	Miscellaneous business services
75	Automobile repair, automobile services, and garages
76	Miscellaneous repair services
78	Motion pictures
79	Amusement and recreation services, except motion pictures (excludes nonprofit membership recreational services)

The basic tabulations on Selected Services in this publication (table 1) are limited to the above classifications. See the Kind-of-Business Classifications section of Appendix A, General Explanation, for definitions of the kind-of-business categories for which data are shown in the basic tabulations.

Data for the following additional industries covered in the 1967 Census of Business are presented for the United States as a whole:

SIC code	Title
Pt. 4111, <sup>2</sup> Pt. 4119, <sup>2</sup> 413, 4 421 <sup>3</sup>	Bus Transportation, except school buses <sup>3</sup>
	Trucking, except with storage

<sup>1</sup>Executive Office of the President, Bureau of the Budget, **Standard Industrial Classification Manual, 1967**.

<sup>2</sup>Of codes 4111 and 4119, only bus transportation is included in scope of the 1967 Census of Selected Services; and of code 4721, only travel agencies.

<sup>3</sup>Only bus and truck carriers not subject to Interstate Commerce Commission economic regulations are included in the scope of this census.

Data were also collected for the following industries which are presented in separate reports:

SIC code	Title
Pt. 4721 <sup>2</sup>	Travel agencies
8072	Dental laboratories
8111	Legal services
8911	Engineering and architectural services

The following groups of the Services Division, as presented in the SIC Manual, are excluded from the scope of this census:

SIC code	Title
702, 704	Rooming houses and organization hotels
80 (exc. 8072)	Medical and other health services, except dental laboratories
82	Educational services
84	Museums, art galleries, and botanical and zoological gardens
86	Nonprofit membership organizations
88	Private households
89 (exc. 8911)	Miscellaneous services, except engineering and architectural services

Symphony orchestras, ballet and opera companies, and similar services organized on a nonprofit basis are included in this census. However, nonprofit establishments operated to provide recreational facilities for their members (part of SIC 79) and whose income is exempt from payment of Federal income tax under the provisions of section 501 of the Internal Revenue Code are not included. Also excluded are services from other divisions of the SIC Manual, other than travel agents (part of Industry 4721) and the specified transportation services of SIC codes 41 and 42.

The data in this report supplement those in the area reports series BC67-SA. Most of the tabulations included in this report are based on special inquiries directed to establishments with payroll ("employers") in the following classifications as defined in the Standard Industrial Classification (SIC) Manual:

SIC code	Title
722	Photographic studios, including commercial photography
7311	Advertising agencies
732	Consumer credit reporting agencies, mercantile reporting agencies, and adjustment and collection agencies.
7391	Commercial research and development laboratories
7397	Commercial testing laboratories
751	Automobile rentals without drivers
752	Automobile parking
753	Automobile repair shops
7933	Bowling alleys
7941	Professional sports clubs, athletic fields, arenas and sports promoters
7948	Race track operation (including racing stables)
8072	Dental laboratories

Special reports are also available for establishments with payroll in the subject reports series for the following Selected Service industries:

SIC code	Subjects	Report No:
701	Hotels, motor hotels, and motels	BC67-SS2
721, 727	Laundries, cleaning plants, related services	BC67-SS3
78	Motion pictures	BC67-SS4
81	Law firms	BC67-SS5
8911	Architectural and engineering firms	BC67-SS6
4721 pt.	Travel agencies	BC67-SS7

**CENSUS DISCLOSURE RULES**—In accordance with Federal law governing census reports, any data which would disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

**CORRECTIONS TO DATA**—Some of the data in this report comprise the statistical portions of previously published reports: Corrections to errors found after those reports were issued have not been carried to this report unless they significantly affect the data.

## GENERAL EXPLANATION

### CENSUS COVERAGE

**Method of Coverage**—Effective with the 1967 Census of Business, a major shift in the method of compiling data was introduced. In the 1954, 1958, and 1963 censuses, data for all "employer" establishments (those which had some paid employment during the census year) were obtained through a mail canvass. Information for "nonemployers" was obtained from Federal income tax records.

In the 1967 Census of Business, service firms were divided into two categories—the "mail" universe and the "nonmail" universe. The coverage of each component and the method of obtaining census information for these two groups are described below.

1. The "nonmail" universe—This group consists of firms which were not required to file a regular census return and includes the following categories:

a. All "nonemployers"—Consists of all firms with no paid employment during 1967. Receipts information for these firms was obtained from 1967 Federal income tax records. Although made up of a large number of firms, this segment accounted for only 9 percent of selected services receipts. This percentage varies, however, by kind of business as indicated in table 1 of this report. (Also see "Comparison of the 1963 Census With the 1967 Census," item 3, below.)

In the 1967 census, data for all non-employer establishments were compiled from tax records. In the 1963 census, data were compiled from only one-half of the nonemployer tax returns and were multiplied by 2 to establish census totals.

The census included only those service nonemployer firms which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. This treatment is the same as in the 1963 census.

b. Selected "small employers"—"Employers" consist of all business firms in

the active records of the Internal Revenue Service (IRS) which were subject to payment of Federal Insurance Contribution Act (FICA) taxes. "Small employers" consist basically of all those single unit firms with payroll below a specified cutoff. The cutoff varied by kind of business, but was designed, in most cases, to limit the "non-mail" group to establishments which would account for not more than 20 percent of total receipts in any kind of business. The "number-of-employee" equivalent of the payroll cutoff generally was in the range of one to three employees.

Data on receipts, payroll, and employment for "under cutoff" employer firms were obtained from the administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA).

2. The "mail" universe—Information for firms in this group was obtained basically by means of a mail canvass. However, information on first quarter payroll and mid-March employment for single-unit employers (section b. below) was obtained from IRS and SSA records. It is from firms in this group that specialized data, in addition to receipts, annual payroll, and employment, were collected. For some kinds of businesses included in this report, all employer firms were included in the mail universe. For those kinds of businesses for which a "payroll cutoff" was applied (as described in item 1-b above), the tables in this report are presented in a manner to show the total number of establishments and receipts of all employer firms as well as similar data for all employer firms with annual payroll above the "payroll cutoff" (and, therefore, included in the mail universe). Appendix B presents facsimiles of the report forms used in the mail canvass for kinds of businesses included in this report. The mail universe includes the following categories:

a. Firms in the census prec canvass—The census prec canvass operation was basically designed to identify firms which operated units at more than one location.

Firms which were included in the prec canvass were drawn primarily from 1963 census records of multiunit firms and larger employers.

b. Firms not in the census prec canvass—Other firms included in the mail universe consists of employers other than those covered by section 1-b or 2-a above.

**3. The truck carrier survey**—The truck carrier phase of the census was based on a probability sample of all carriers with payroll in the "trucking, except with storage," industry (see "Kinds of Business Covered" in the "Introduction" to this report). All carriers with 10 employees or more, and a 10 percent sample of carriers with fewer than 10 employees were represented in the "mail" universe. Additional information may be obtained from the Business Division, Bureau of the Census, Washington, D.C. 20233.

**Comparison of the 1963 Census with the 1967 Census**—Except for the method of coverage described above, the 1963 and 1967 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

**1. Classification**—For both 1963 and 1967, nonemployer firms were classified on the basis of information supplied on the Federal income tax returns. However, the 1967 classifications for nonemployer firms were coded in less detail than in 1963. Therefore, 1967 data for the combination of "employer" and "nonemployer" establishments are presented in less kind-of-business detail than was the case in 1963. Data for employer establishments, however, are shown in full detail.

For 1963, nonemployer firms were classified by IRS personnel with technical assistance of Census Bureau personnel. For 1967, classification of these firms was performed by personnel of the IRS through use of a coded listing of the kinds of business which were to be separately identified. While the technique of classification was substantially the same and was based on the firm's description of its principal business activity, greater use was made in 1967 of "basket" classifications (e.g., miscellaneous business services).

The 1967 census classification for the small employer firms (see coverage of employers

above) which were not mailed the census report form was based on the following:

a. If the firm had been in business in 1963, the kind-of-business classification which had been assigned in that census was used.

b. If the firm was a "birth" since 1963, the SSA classification was used if it corresponded to a census classification.

c. If an adequate kind-of-business classification could not be assigned under the procedures outlined in a. and b. above, the firm was mailed a brief inquiry requesting information needed to assign such a classification.

d. If these three procedures proved inadequate, the firm's description of its principal business activity as entered on its IRS business tax return was used.

To determine the census classification for both 1963 and 1967 for establishments in the mail universe (section 2 under "Census Coverage" above), considerable use was made of "self-designation." For kinds of business which posed classification problems, however, special questions were included to assist in assignment of the census classification.

In addition to differences in classification based on the method of enumeration, some changes were made in the 1967 census in the individual kind-of-business classifications which are detailed in the "Kind-of-Business Classification" section below.

**2. Active proprietors**—In the 1963 census, the number of active proprietors of unincorporated businesses was computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors for each establishment in business during the week of November 15. In this report, the count of active proprietors is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms, including multiunits firms:

a. All firms in business the full year.

b. All payroll firms in business during the pay period including March 12, 1967.

c. Every second nonpayroll firm not in business the full year.

**3. Coverage of nonemployers**—Although a comparison of data for nonemployer firms from the 1963 and 1967-censuses seems to

indicate that there was an increase in the number of such firms and that they accounted for approximately as large a proportion of total service receipts volume in 1967 as in 1963, these conclusions are subject to the following limitations:

The combination of (1) the census processing cutoff occurring before the completion of the flow of tax forms from which the census nonemployer data were derived and (2) other processing omissions is estimated to have led to a loss of about 50,000 nonemployer firms accounting for about 1 percent of service receipts volume in 1963. This estimate, which is based on a study of a sample of tax forms made after the 1963 census results were compiled, reflects a more substantial census omission than previously had been estimated. Because of a later processing date for the 1967 census, omissions from this census are believed to be negligible. Both censuses probably omitted a small number of nonemployers (accounting for a negligible receipts volume) because the tax form kind-of-business description was inadequate to indicate they conducted an in-scope kind of business.

As noted in section 1-a under "Method of Coverage" above, only those service nonemployer establishments were included in the census which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. While these are the same rules used in the 1963 census, a modification to reflect price changes probably would have resulted in the exclusion of several thousand additional marginal firms.

**4. Payroll**—In 1963 the inclusion in payroll of gratuities received by employees from patrons was not requested. In 1967, both in the case of payroll reported to the Internal Revenue Service and payrolls reported to the Census Bureau, businesses were requested to include in payroll the amount of tips and gratuities which were reported to employers as received by employees from patrons.

## EXPLANATION OF TERMS

**Establishments**—An establishment is a single physical location at which business is conducted. An establishment is not necessarily

identical with the "company" or "enterprise," which may consist of one or more establishments. Census of business figures represent a summary of reports for individual establishments rather than for companies. For businesses which were mailed a census form, separate information was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities were generally grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification (SIC) Manual<sup>1</sup> for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

Leased service departments (separately owned businesses operated as departments of another service establishment or of a retail establishment, such as, a separately owned shoeshine parlor in a barber shop or a beauty salon in a department store) are treated as separate service establishments in the selected services portion of the 1967 census.

**Receipts**—Receipts include the total of all receipts from customers for services rendered and merchandise sold during 1967 whether or not payment was received during 1967. Total receipts exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the establishment directly from customers and paid directly by the establishment to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer

or wholesaler and passed along to the service establishment are also included.

Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, and other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sales of merchandise to individuals or to other businesses) by establishments primarily engaged in performing services.

Although the count of establishments in this report represents the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year. Nonemployer establishments are included in the tables if they operated at an annual receipts volume rate of \$1,000 or more; however, their reported receipts have not been projected to a full year's operation.

**Payroll entire year**—Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons which were reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include compensation of proprietors or of partners. Payroll is reported before deductions for social security, income tax, insurance dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for purposes of reporting on form 941.

**Paid employees for the pay period including March 12, 1967**—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1967. Included are employees on paid sick leave, paid holidays, and paid vacations. Proprietors and partners of unincorporated businesses are not included. The definition of paid employees is the same as used in reporting on IRS Form 941.

**Active proprietors of unincorporated businesses**—The number of active proprietors shown in this report is based on crediting each sole proprietorship with one active proprietor

and each partnership with two active proprietors for the following types of firms:

1. All firms in business the full year.
2. All payroll firms in business during the pay period including March 12, 1967.
3. Every second nonpayroll firm not in business the full year.

For multiunit proprietorships and partnerships, proprietors were credited to only one establishment of such multiunits.

**Standard metropolitan statistical area**—The standard metropolitan statistical areas (SMSA's) for which data are shown are those defined by the Bureau of the Budget.<sup>2</sup> A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are the units used in defining an SMSA.

**Central administrative offices and auxiliaries**—Each company included in this census was asked to identify and report separately as "central administrative offices" or "auxiliaries" those locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data for such central administrative offices or auxiliary units of service establishments are included in special tables of this report.

## KIND-OF-BUSINESS CLASSIFICATIONS

"Services" as defined in the 1967 edition of the SIC Manual, includes establishments primarily engaged in rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned a kind-of-business classification in

---

<sup>2</sup> Executive Office of the President, Bureau of the Budget, **Standard Metropolitan Statistical Areas, 1967**, as amended January 15, 1968.

accordance with the provisions of the 1967 edition of the SIC Manual. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

The basis for kind-of-business classification is described above in the sections under "Method of Coverage" and "Comparison of the 1963 Census With the 1967 Census—Classification." Descriptions of those kinds of business for which data are provided follow.

#### **HOTELS, MOTELS, TOURIST COURTS, AND CAMPS**

Apartment or residential hotels which provide accommodations for transients are included. Also included are commercial establishments which provide camping and trailer space or camping facilities on a fee basis.

**Hotels, motels, and tourist courts (SIC 7011)**—The 1967 edition of the Standard Industrial Classification Manual combines hotels and motels into a single classification entitled, "Hotels, tourist courts, and motels." 2. Year-round hotels, with less than 25 guest rooms.
3. Seasonal hotels.
